## **RIFE TECHNOLOGY FREQUENCIES, RESEARCH, AND CONCLUSIONS**

---

### **WARNING and DISCLAIMER**

Just because TrueRife has researched these frequencies, do not assume that we advocate treatment using them. They are intended as a guide to further research. These frequencies should be viewed as experimental only! They have not been established through clinical research or double blind studies as being effective in the treatment of any disease. At the time of this writing, Rife Technology does not have FDA approval for the treatment of disease. The user of this information assumes all responsibility and liability for the outcome of treatments involving the use of this information. Reactions to some frequency sets can be life threatening for those who may have certain serious conditions. Some individuals may experience serious side effects as a result of detoxification. Drinking large amounts of water is strongly advocated to reduce symptoms of detoxification.

TrueRife, Michael Tigchelaar, nor its representatives makes any medical claims of the suitability of these frequencies or possible effects. Persons with medical problems are urged to consult a qualified health care practitioner.

### **INSTRUCTIONS**

1. You may use all the frequencies in the tables or simply test with a given number then if no improvement is seen move to another set.
2. Some individuals experience an increase in symptoms as a result of the die off of microorganisms. It is recommended that subject drink 6-8 additional glasses of water after sessions to aid in detoxification. Drinking water on an empty stomach is highly recommended for more effective detoxification. Since detoxification is needed to flush away blasted debris, it is important to employ the speediest method of detoxing, which will in turn speed up healing. The most rapid way to detox is on an empty stomach. It takes 3 hrs after a meal for your stomach to digest and metabolize your meal, so one may want to plan their Rife sessions after meals. This may not always be practical, but is presented as the most effective means where heavy detoxification is an expected result. Fruit will digest in one sixth the time or a half hour, so one may want to eat fruit if hungry to sustain them before a heavy Rife session. After sessions one should immediately began drinking water. Drinking plenty of water on a full stomach actually can slow digestion and dilute the digestive enzymes causing the meal to putrefy

adding to the toxicity. These are general guidelines to follow, and of course may not always be practical.

3. In some cases, parasites are killed during sessions. These parasites may play host to viruses that then seek a new host. It is not uncommon for individuals to come down with a “COLD” a few days after session. To prevent this, it may be wise to include an “ALL BUGS KILL” using a frequency sweep to eliminate these viruses. *This need not be done after every session.*
4. Serious, Chronic or life threatening conditions such as HIV, CANCER, HEPATITIS C, Etc, should be treated for no less than 30-60 minutes each day, and sometimes one session morning, and another frequency set in the afternoon, till all traces of the virus is eliminated or it has been confirmed that the condition is in total remission.
5. Rife frequencies do not build the immune system, so it is important that a healthy diet and lifestyle be maintained along with established treatments by your physician.
6. Maintaining proper blood pH cannot be under emphasized for the body to make the necessary biochemical changes to restore normal function from previous viral damage, as well as bring the organism into the correct MOR to bring about it's destruction. Cancer blood pH should be raised to 8.0. All disease is in the blood. Over 140 diseases thrive in a low pH blood acid environment. Elevating pH levels to blood alkaline creates a state of “wellness” and can be of great assistance in the bodies ability to fight disease. In one eight year study of 200 terminally ill patients whose blood pH was elevated to alkaline, only eight succumbed to their disease. Blood pH can be elevated by supplementing MSM, Calcium or Alfalfa. One should try to maintain a minimum of 7.3. Saliva blood pH test strip can be purchased at most health food stores or pharmacies.
7. Using a sweep mode, versus a pulse when setting up these frequencies is important to deal with possible mutations of the virus. Using a pulse for 5 minutes followed by a sweep of the most effective frequency may bring more positive results. Sweeps can be 1-2 Hz up and down.
8. Pain sets are only effective if there is a viral link. Viruses attack the

weakest area during infections, as they seek safe harbor where the immune system is at its weakest. This may be in areas of old injury where chronic pain is felt. Thus when one gets the flu, old injuries often flare up.

9. Exposure over 8 hrs per day may result in unknown health consequences. Higher frequencies approaching 10,000 or greater should have a more limited exposure time. (3-5 minutes) The TrueRife Generators automatically reduce power output at higher frequencies for safety.

10. Frequencies sets already programed in the software should be used first as these have been validated. Sets in this manual have not all been validated and should only be used after trying the already programmed sets.

11. Frequencies in the 2000-2200 range are thought to increase the activity of the immune system cells as well as improve blood circulation, so these can also be helpful in any infectious disease, even if they do not address a condition directly.

12. TrueRife Generators operate in the range of 1 Hz –10,000 Hz. If the frequency is above 10,000 divide by 2. Hulda Clark's frequency set (in the NCFL) may be useful if a specific pathogen is known. The frequencies are stated in KHz, and are in the 80- 900 KHz range, so cannot be run directly on TrueRife generators. For some of her frequencies, dividing them by 440 works well. In some cases, dividing by 100 or 1000 may provide a useful frequency. The best general conversion factor we have found so far is to divide by 512, although dividing by 256, 128, 64, 32, etc, may provide a better frequency. For the TrueRife Generator frequencies which are out of range, dividing by 64 seems to work best, and dividing by 8 will usually also yield a valuable frequency, as will 2, 4, 16, 32, etc.

The Effectrolysis system will run frequencies up to 1.5 million Hz.

13. Most people run frequencies two to three minutes each.

14. Scans can be effective for determining new frequencies, as well as therapeutic by themselves. Running scans is feasible only with a programmable function generator such as the TrueRife F-110, since manually entering a single frequency every few seconds hundreds of times in a session is not practical. The best ranges I have found for scanning are 300-800 and 2000-2500/2600Hz. Each frequency in a scan is run for 3 to 10 seconds. Any "hits" are noted and after the session these frequencies are run for a full three minutes

each. Hits are any frequencies, which cause a sensation, such as tingling, pulsing, tickling, itching, etc.

15. Note that many times (if not most of the time) frequencies that are beneficial may not cause any sensation. And, many times frequencies which are hits may cause no apparent benefit. In general, though, frequencies, which produce consistent hits over multiple sessions, are usually therapeutic, and should be included in sessions until they no longer do.

16. The TrueRife function generators have the ability to scan or sweep about a chosen frequency with a predefined number of steps. Setting 728Hz with a contracting 3Hz scan at 20 seconds will yield 731, 725, 730, 726, 729, 727, and 728, running 7 frequencies for 20 seconds each for a total of 140 seconds. This may be a valuable method to more completely address a pathogen, particularly one that mutates. This makes for long sets, but may be the best method for dealing with stubborn conditions.

17. Place the True Rife Bulb stand and holder as close to the area to be treated as possible. Preferably within one foot or less. This results in increased signal strength! Nighttime frequency sets may require up to three feet for sleep, while the generator is running for safety and comfort. Although the nighttime frequency sets which are run from up to three feet away should have sufficient power for kills, daytime sets, especially for **chronic conditions** such as Cancer, Hepatitis C, Parasites or Arthritis for example, can be run by placing the TrueRife Bulb in direct contact to the skin. This results in complete body penetration, as the persons entire body will actually began emitting the selected frequencies. Excellent results have been achieved with NO direct contact with the body for numerous problems. Even when the bulb is a foot or more away. But this is a suggestion to use where there are concerns that the problem is throughout the entire body, and entire body penetration is desired. It would be suggested however that the bulb still be placed to the closest proximity of the problem area to be treated.

18. Allow yourself time to heal. Healing typically takes place in cycles: 3 days, 7 days, 21 days, 42 days, 6 months, 1 year, 2 years.

## Common Questions and Answers

**I have not tried to use the big bulb yet, what do I do with the big bulb, just sit and look at it? Hold it? Where is it placed?**

*The big bulb is used primarily in radiant mode without grounding (holding the grounding tube). Many people use this bulb and stand to run overnight sets while sleeping. Run this bulb about 3 feet or less from your body. This bulb has 4X the output of the spiral bulb. Every foot closer will give you approximately 4X the energy to your body. If you choose to make contact with this larger bulb, be aware that some people may get a hair raising experience on lower frequencies if holding the grounding tube. This is the reason for High Energy Grounding Control or the Matrix foot plate, so that such high output can be limited while making contact with the large bulb with such tremendous energy flow.*

*When using the spiral bulb, **make contact with your skin** to the area of distress while holding the grounding tube or using the Matrix foot plate. Always grab the grounding tube first before making contact with the bulb. This will give you maximum energy flow. Most people will not have grounding issues with the spiral bulb.*

*Rules to follow:*

*For pain issues, place the bulb in skin contact with the area of pain.*

*For cold and flu, the chest.*

*For parasites or intestinal problems the stomach area.*

*For prostate or cancers in these areas tuck the spiral bulb into the waistline.*

*Headaches, ear infections or dental problems, use the bulb on the cheek.*

**Where does the color/stuff come from in the water? Is it actually being drawn out of the body or is it a chemical reaction in the water? Strange!**

*There is always some discoloration of the water due to the effect of the Effectrolysis on the minerals in the water and ionization. The baseline is a carmel color. You will see variance as pictured in the color chart according to the programs and who is on the system. Everything floating is from your body as well as variances in color. The ionized energy field has a drawing effect of toxicity and debris out of the body. If you are running both bulb and Effectrolysis sessions, then run the Effectrolysis second to assist in removal of debris and toxicity generated by the bulb.*

## **Is there any danger to any option with children?**

*For reasons of liability, I cannot recommend running these systems on children. Use at your own risk*

*I know of individuals who have run systems on children as young as 2 years old. However I would not ground a small child because of the danger of shock. Using this on children is a personal matter, and there is always some **risk** with any device. I personally have not seen any negative effects on small children, and have witnessed cold and flu symptoms completely disappear in 24 hours or less in children, while the same program took up to 72 hours to clear an adult with the same virus.*

*Some have expressed concern over a small child's ability to detox debris created by such systems after sessions. I have not witnessed such events, but would not argue these concerns.*

*I have never run a small child on an Effectrolsis system. If one chooses to do so, I would not use the grounding tube.*

## **Using the big bulb I do understand it is used without grounding, but I assume its more effective and stronger using the ground?**

*The big bulb is used primarily in radiant mode without grounding (holding the grounding tube). Many people use this bulb and stand to run overnight sets while sleeping. Run this bulb about 3 feet or less from your body. This bulb has 4X the output of the spiral bulb. Every foot closer will give you approximately 4X the energy to your body. If you choose to make contact with this larger bulb, be aware that some people may get a hair raising experience on lower frequencies if holding the grounding tube. This is the reason for High Energy Grounding Control, so that such high output can be limited while making contact with the large bulb with such tremendous energy flow.*

*There are effects without grounding. Running the bulb without ground is similar to the energy flow you would get from a microwave. There is a bulb that emits frequencies causing water to oscillate which produces heat and energy flow with no contact whatsoever. With your bulb there is an Electromagnetic field that carries the energy through the body. Plasma devices give full body penetration. Contact devices are like putting a 20 lb turkey on the burner of a stove and trying to heat it up. There is an effect along the surface or area of contact, but no real penetration. Also just because you cannot feel the effects while holding the grounding tube on higher frequencies does NOT mean there is no energy flow through the ground.*

## **Herxheimer Reaction**

Herxheimer (aka "detox") reaction is a flu-like feeling that one gets when parasites, fungi, bacteria, viruses, and other pathogens are killed in the body, by conventional or alternative means. One person who suffers chronic candida (yeast infection) and has experienced the reaction many times made the remark, "Got my typical Herx reaction: cold, dizzy, light-headed, faint, can't-really-think-straight feeling." Others describe it as a "bone-tired feeling." If a session is particularly effective, the onset of the herxheimer can begin within a couple of hours of exposure. Muscle and joint pain become more pronounced. Reactions typically last up to two days but can last longer if steps are not taken.

When the kidneys, liver, colon, and lymph are working effectively and there is plenty of water, minerals, antioxidants, and other nutrients, the reaction will be unnoticed for most minor infections. Treatments which can kill pathogens should not be resumed until the reaction has passed, except in rare cases. Physiological effects of a herx include an increase in uric acid, which is neutralized by the body by giving up base minerals like calcium, magnesium, sodium, and potassium. Urine output is increased by the body to clean the kidneys, and this dehydrates and also depletes minerals, like the ones above and selenium, all which are important in regulating heart function. This dehydration and electrolyte imbalance is likely the main culprit for most of the symptoms.

Until the body has recovered, antipathogenic treatments cannot be continued or the load will build up and make it that much worse. If one is fighting a pathogen which requires treatment every three days and is not taking steps to minimize detox such that four days or more are required to recover, it is of no use to continue treatment.

Hopefully this illustrates how very important it is to control detox reactions.

## Viral Complex

Often times when we hear of illness it is categorized as a particular disease or pathogen by name. In reality, illness is often a complex of pathogens, some of which may be categorized as viral, others bacterial and still others as parasitical. The bodies immune system is constantly addressing all of these factors to maintain a balance of health.

It is because of viral complex or the layering of pathogens that disease is often misdiagnosed and mistreated, and the illness may become chronic and systemic. Many look for the quick fix, the magic pill or specific treatment that will turn the tide, not realizing that just as the illness is a complex of pathogens, the solution may be a complex of protocols that addresses each layer to bring about resolution.

Diet does play an important role in the battle against viral complex. Elevating pH levels alone to 7.0 or higher can eliminate an environment that supports over 140 diseases. Eliminating carbohydrates short term may also be necessary to starve out certain yeast infections. (Kicking the beast and then feeding it may not yield the desired results!)

When it comes to using Rife Technology, one would want to research all the possible links to the disease or condition that they are battling, then begin running the programs systematically for weeks or months to burn out each layer of the condition. Along with these frequencies, other health protocols should be implemented to gain the maximum results.

In looking at overall health, one may begin with parasite frequencies. Parasites have been determined by some researchers to be the underlying cause of many chronic as well as terminal conditions. Conditions such as arthritis, depression, lupus, and even some cancers have responded well to a parasite kill.

The following Rife cleanup protocols may yield substantial progress if used long term in dealing with viral complex.

## **Schumanns Resonance and Accelerated Healing**

The Resonant Frequencies of the earth were first calculated by Tesla and some 60 years later by William Schumann in the late 1950's, by using a mathematical equation involving the speed of light and the earth's circumference. Tesla and Schumann were thus able to accurately predict the earth's frequencies or resonance. Their conclusions have been validated in recent years by electronic instruments that can detect the earth's EM Field and its resonating frequency.

Here is the info on the Earth's EM Field. It primarily resonates at a frequency of 7.83 Hz, but goes through resonant shifts of **14hz 20hz 26hz 33hz 39hz 45 Hz.**

You can tune your TrueRife system to these frequencies, as these are the earth's harmonics. Your TrueRife system has a DC EM field and will simulate the earth's polarity between its crust and the ionosphere. These frequencies are believed to stimulate normal brain wave patterns (brain waves operate at 7.8hz) and in theory, according to Canadian EM Field researchers, promote healing by correcting the bodies polarity, or bringing it into phase.

This would be my program:

Dwell 900

26 20 33 39 45

Dwell 300

78.3 140

200 330 450 783

This program is saved in the Normalizing Frequencies Folder under Accelerated Healing\_90

This program can be run twice a day to accelerate healing.

**WARNING:** Early experimentation has shown the possibility of higher levels of anxiety in those with anxiety disorders when exposed to these frequencies.

## **FURTHER INFO ON EARTH RESONANT FREQUENCY**

A layer of electrically charged particles called the ionosphere surrounds our

planet. The lower layer of the ionosphere is roughly 80 km from the crust; this charged layer is known to reflect radio waves. Bombardment by HAARP signals "pushes" out this boundary layer, thus altering the natural pulsating rhythm. Natural fluctuations in frequency occur daily, by the lunar month, and in response to solar flares.

Since this is a highly charged layer, the ionosphere forms a so-called capacitor with the Earth. This means that there is a difference in electrical potential between the two, the Earth being negatively charged and the ionosphere being positively charged. This potential varies somewhat but is around 200 volts/m. This is a fundamental type of electrical generator. The solar winds, interacting with the upper atmosphere rotation, act as a collector and brushes of a generator. The lower atmosphere can be seen as a storage battery for this gradient potential.

This electromagnetic field around the earth can be viewed as a stiff jelly. When our bodies move and vibrate, these movements are transmitted to the environment, and vice versa. These fields not only impinge on our bodies, they also affect the charges inside our bodies. When we are standing on the ground, under normal conditions, we are grounded. Our body then acts as a sink for the electrostatic field and actually distorts the force lines somewhat. Our body also has its own electrostatic field about itself. These field lines are the result of the various biochemical reactions in the body. This resultant bio-field couples us to the isoelectric field of the planet (Miller & Miller, 1981).

Since the earth's atmosphere carries a charge, a current and a voltage, it is not surprising to find such electromagnetic waves. The resonant properties of this terrestrial cavity were first mathematically predicted by German physicist W. O. Schumann between 1952 and 1957, and subsequently detected by him with König in 1954. Much of the research in recent decades has been conducted by the Department of the Navy who use Extremely Low Frequency (ELF) signals for communication with submarines. Of course, little attention is given by defense contractors to issues of psychobiological health and well being.

Between the almost perfectly conducting terrestrial surface and ionosphere, a resonating cavity is formed. Broadband electromagnetic impulses, like those from lightning flashes, fill this cavity, and create globally enveloping Schumann resonances ranging from frequencies 5 - 50 Hz (Schumann, 1952; Bliokh et al., 1980; Sentman, 1987). The nominal average frequencies observed are **7.8, 14, 20, 26, 33, 39, and 45 Hz** with slight diurnal variation

# **HISTORY OF THE DEVELOPMENT OF A SUCCESSFUL TREATMENT FOR CANCER AND OTHER VIRUS, BACTERIA AND FUNGI**

by

**ROYAL RAYMOND RIFE**

## **Introduction (TO CANCER)**

Before my discovery of the cause of cancer and other diseases, I had sought to find such evidence with standard Research microscopes. I observed all types of malignant tissue to find some trace of the cause. I felt that the start of malignancy would be originated by some type of micro-organism.

It became obvious that in order to find the cause, better means of observation had to be developed. Thus five microscopes were designed and built in the laboratory with a range of 5,000 to 50,000 X. Working in magnifications of 17,000 X and higher revealed new cells and micro-organisms requiring much skill and patience to focus and photograph. After the isolation of the filtered virus and other pathogenic organisms, the idea was conceived, that it would be possible to create an electronic frequency that was in the correct coordination or resonance of the chemical constituents of a given organism or virus, and to devitalize with said frequency, the organism or virus in question.

The initial frequency instrument of this nature was first used and developed in the laboratory in 1920. Due to the great advancement in the field of electronics, these frequency instruments have steadily improved to the present day.

The isolation of cancer virus and other micro-organisms was an accomplishment with which I felt a great deal of pride. Finally in 1931, I discovered the transformation of cancer virus and the successful treatment for cancer and other diseases by actual observation of the universal microscope while applying the frequency instrument. Thus, this data is presented for evaluation. With the frequency instrument, no tissue is destroyed, no pain is felt, no noise is audible, and no sensation is noticed. A tube lights up and 3 minutes later the treatment is completed. The virus or bacteria is destroyed and the body then recovers itself naturally from the toxic effect of the virus and or bacteria. Several disease forms may be treated simultaneously.

## **GENERAL DISCUSSION OF VIRUS OBSERVATION**

The major portion of the cancer tests of the tumors used in the initial tests were procured from the Paradise Valley Sanatorium in National City, California. The pathology of these tumors was checked through their laboratory as malignant.

The prime reason that viruses have never been observed in their true form of their association with a disease is because the best standard research microscopes will not show them; first, on account of the lack of great enough magnification and second, owing to the

minuteness of these particles, it is impossible to stain them with any known method or technique using acid or aniline dye stains; hence a substitute stain was found. The viruses were stained with a frequency of light that coordinates with the chemical constituents of the particle or micro-organism under observation.

The variation of the light frequency is accomplished by use of a variable monochromatic beam of light that is tuned to coordinate with the chemical constituents of particle, virus, or micro-organism is observed by use of the core beams from the patented Rife Microscope Lamps, which provide illumination through a series of rotating quartz prisms in the universal microscope and thence through the slide containing the specimens and on to the eyepiece. Rotation of the light beams in the quartz prisms controls the increase or decrease of the light frequency. With complete control of the illuminating unit, a frequency is created that is in coordination with the chemical constituents of the virus under observation and thus it is possible to observe the virus in its chemical refractive index. The control of the illumination (in the universal microscope and the other Rife Research microscopes) is a most important factor in visualizing the virus of any pathogenic micro-organism. This cannot be accomplished by any conventional sources of illumination. This points out why other research groups have failed to find cancer virus.

We believe and have proven to our satisfaction that the so-called virus is in reality the premodal cell of a micro-organism. We also have proven that it is the chemical constituents and chemical radicals of the virus under observation which enacts upon the unbalanced cell metabolism of the body to produce any disease that may occur. We have in many instances produced all the symptoms of the disease chemically without the inoculation of any virus or bacteria in the tissues of experimental animals.

We have classified the entire category of pathogenic bacteria into 10 individual groups. Any organism within its group can be readily changed to any other organism within the ten groups depending upon the media with which it is fed and grown. For example, with a pure culture of bacillus coli, by altering the media as little as two parts per million by volume, we can change that organism in 36 hours to a bacillus typhosis showing every known laboratory test even to the Widal reaction. Further controlled alterations of the media will end up with the virus of poliomyelitis or tuberculosis or cancer as desired, and then, if you please, alter the media again and change the micro-organism back to a bacillus coli.

## **METHODS OF CULTURE AND TECHNIQUES OF ISOLATION OF THE VIRUS OF CANCER**

The methods and principles that were used in this procedure were as herein related. An un ulcerated breast mass that was checked for malignancy by their laboratory and ourselves came to our laboratory from the Paradise Valley Sanitarium of National City, California. The experiments of 1931 and 1932 were conducted in our Point Loma Laboratory, then known as the Rife Research Laboratory.

Ten millimeter blocks of this tumor (in 1932) were placed in "K" media and incubated at 37.5 degrees C with no results. After many long procedures and attempts to grow the cancer virus had failed, the discovery of the growth method of cancer virus was found. A test tube

containing a sample from the un ulcerated breast mass was sealed and placed in an argon gas filled loop with 15 mm vacuum and activated with 5000 volts. This produced a decided change of ionized cloudiness in the media. (This media was of tyrode solution and desiccated slime (sic) intestine). This test tube was then checked for cancer virus, but at this point none were visible. Then the test tube was subjected to a 2-inch water vacuum and incubated for 24 hours. Upon examination the solution in the test tube was teeming with cancer virus which were the most highly motile and the smallest in size of any of the viruses previously isolated.

These BX or cancer viruses refracted a purplish red color with the monochromatic beam. We have not thoroughly determined the phenomena that takes place with this technic of culturization, but we believe that this method brings the organism from the ultraviolet band into the visibility of refraction. (This method does not alter the virulence of the virus in any way). This virus is bi-polar (and will attract to both the positive and negative poles), but requiring both the + & - parts to produce a reaction in the tissues of the experimental animals. Our method used in this procedure was as follows: Albino rats were generally used. The animal chosen for this experimental work is carried no less than 12 day through quarantine. The animal is shaved at the point of inoculation and placed under a partial anesthesia. The needle for inoculation is filled with triple sterilized petroleum jelly and the inoculum and passed no less than 20 mm under the epidermis to the point of inoculation. In 3 to 4 days almost invariably there is an open lesion which appears in the thyroid area. This recedes at the end of that time and the growth of the tumor starts at the seat of inoculation which is a mammary gland. These tumors develop very rapidly owing to the metabolic rate of the albino rat. In many cases these tumors have grown to weight exceeding that of the animal. Upon surgical removal of this mass and upon microscopical examination---a true malignancy is shown. That proved that the virus was pathological. These experiments were carried through no less than one hundred times with the same methods and careful technic with the same end results. We sincerely believe that this leaves no doubt as to the fact (that the BX organism initially isolated from the un ulcerated human tumor and recovered from the tumor produced by that BX virus and that BX virus again recovered) that BX is the primary cause of cancer. We have in our own classification called this virus of cancer--BX. We do not expect any laboratory to be able to produce BX on account of the technic involved and the lack of adequate optical equipment. This BX or any other virus cannot be seen with the conventional microscope and illuminating systems as we have explained often before. That these tiny live living entities (known as BX virus) cannot be stained with any of the conventional acid or aniline dye stains as they are much smaller in dimension than the molecular particles of said stain and can be seen only by a frequency of light which coordinates with their chemical constituents. All viruses require their own individual frequency of the mono-chromatic beam to make them visible to the human eye.

We have come to the conclusion that the illuminant in the fields of high powered microscopy is a more important factor than the high power in magnification of the microscope because without this source of illumination these particles called virus are invisible with any amount of magnification o we have used Koch's postulates in our methods of recovery which are that the organism inoculated into the host must again be recovered in its true form from the host and thus, as stated before this has been repeated

hundreds of times proving to our own satisfaction that BX or cancer virus is the cause of malignancy.

This BX virus can be readily changed into different forms of its life cycle by the media upon which it is grown.

### **THE PROCESS TO PRODUCE THE CANCER VIRUS PHOTOMICROGRAPH**

(Copyright 1953)

A pure culture of cancer virus is taken from a known tumor and filtered through a 000 Berkefeld (sic) W porcelain filter under 10 mm vacuum. From this filtrate a sample is drawn off with a thin glass tube which has previously been heated, sterilized, and drawn to a fine orifice. One micro-drop is placed on a quartz slide and covered with a quartz cover slip. The slide is positioned on the stage of the universal microscope. The universal microscope is focused on the cancer virus and a 16 mm or 35 mm camera is mounted to expose the (positive) negatives. The (positive) negatives are developed and dried and then placed in a 1000 watt enlarger and exposed for .9 second to a 3 inch by 4 inch glass slide negative which is developed in microdal fine grain developer. From this slide, the photomicrograph copies are reproduced.

Cancer Virus Characteristics

1. Not destroyed by X-Ray, ultra violet or infrared ray.
2. Thermal death point in 24 hours is 42 deg. C or 107.6 deg. F.
3. Sporogenous.
4. Non liquefying (media).
5. Non chromogenic and non aerobic.
6. - (Cathode) polarization.
7. Width of ovoid or microorganism is 1/20 micrometer.
8. Length of ovoid micro-organism is 1/15 micrometer.
9. Flagellated and nonparasitic.
10. Highly motile and plastic.
11. Highly pathogenic.
12. Seen at 12 3/16 degrees angle of refraction on universal microscope.

13. Color of chemical refraction: purple red, which results from the coordinative constituents reaction upon the degree of light frequency applied.

### **TECHNIQUE OF "BX" INOCULATION**

Our method of inoculation of experimental animals with "BX", the virus of cancer, is as follows: The animal is first shaved and sterilized with alcohol and iodine solution at the point of inoculation and placed under partial anesthesia. This avoids subjecting the animal to shock. An extra long, very small needle is used. The needle is filled with the inoculum and the needle placed in the syringe. The needle is inserted no less than 30 mm from the point of inoculation to the epidermis. The point of inoculation is in most cases by a mammary gland for the reason that the "BX" involved was recovered from an un ulcerated human breast mass.

In 3 to 4 days a lesion appears in the thyroid area. The cause of this is unknown, but the lesion recedes and heals over and a growth starts in the mammary gland of the experimental animal. These growths have exceeded the weight of the experimental animal in many cases. The tumor is surgically removed and the "BX" is again recovered in all cases.

An important factor and check is to make at least 10 transplants from the initial isolation of "BX". These transplants are made at 24 hour intervals in the original "K" media. It increases the virulence and speeds up the growth of the tumor. With these experiments that have been repeated on over 100 experimental animals, we are convinced that this method definitely proves the virulence and pathology of "BX" virus.

If there are any workers interested in following this technic, we will furnish them with the formula of "K" media and all of the basic principles involved. However, it is beyond the scope of the average microscope to visualize these minute virus.

### **THE TREATMENT OF "BX" OR CANCER**

The actual cure of cancer in experimental animals occurs with the use of our frequency instrument. To attain these astounding results, a long and tedious process is started to determine the precise setting of the frequency instrument that is the mortal oscillatory rate of this virus. When the setting is found, it is repeated 10 consecutive times after the frequency instrument has been placed back to the same setting before a specific frequency is recorded. These results are observed under the high power of the universal microscope and when the mortal oscillatory rate is reached, the "BX" forms appear to "blow up" or disintegrate in the field. The inoculated animals are then subjected to the same frequency to determine if the effect is the same on the "BX" virus in the tissues of the experimental animals as with the pure culture slides; these successful tests were conducted over 400 times with experimental animals before any attempt was made to use this frequency on human cases. (breaks here with a period. The next page comes after several pages describing viral characteristics as compiled by Crane from Rife notes and other information)  
...of carcinoma.

The first clinical work on cancer was completed under the supervision of Dr. Milbank Johnson, M.D. which was set up under the special medical Research Committee of the University of Southern California. Sixteen cases were treated at the clinic for many types of

malignancy. After 3 months, 14 of these so-called hopeless cases were signed off as clinically cured by the staff of five medical doctors and Dr. Alvin G. Ford, M.D., Pathologist for the group. The treatment consisted of 3 minutes duration using the frequency instrument which was set on the mortal oscillatory rate for "BX" or cancer (at 3 day intervals). It was found that the elapsed time between treatments attains better results than cases treated daily. This gives the lymphatic system an opportunity to absorb and cast off a toxic condition which is produced by the devitalized dead particles of the "BX" or cancer virus. No rise of body temperature was perceptible in any of these cases above normal during or after the frequency instrument treatment. No special diets were used in any of this clinical work, but we sincerely believe that a proper diet compiled for the individual would be of benefit.

### **THE DETERMINATION AND DIAGNOSIS OF CANCER**

We can determine in over 90% of the cases of persons having carcinoma by the examination of a blood smear (with the technique heretofore explained) in 30 minutes. We have also found that in many types of epithelioma that the carcinoma tissue carries no conductivity with a pendulum galvanometer which enables us to outline and determine the location of a tumor without the use of X-Ray photographs. It has also been determined that any case of malignancy treated with either X-Ray or radium or other radio-active materials shows decided radio-activity and harmful tissue effects for many months after the treatments have been given. Destroyed tissue or tissue that has been harmed is a natural parasitic feast. We have also found that tumors treated with this method respond less readily to the treatment of our frequency instruments.

### **RESEARCH ON BACILLUS X (CANCER VIRUS) AND METHODS AND TECHNIC OF ISOLATION**

In 1920 to 1925, some 20,000 pathological tissues were sectioned and stained in the most precise and careful manner, but failed to show any unknown bacteria or foreign material under the highest power of our No. 1 microscope. Attempts were made to culture blocks of tissue taken in the most sterile manner from an unulcerated breast mass of proven (BX) malignancy. These blocks were cut in 5 mm cubes and placed in test tubes containing "K" media. This media is made from dehydrated, desiccated pig intestine and a tyrode solution. "K" media has the faculty of transforming most organisms into their transitional state and is used with micro-organisms to liberate their virus or premodal cells.) The tubes were incubated at various temperatures from 30 to 40 degrees with no results. Then one of the experiments showed results. The test tubes were placed in an Argon gas filled loop excited by 5,000 volts and again examined after 24 hours. There was a decided change and a cloudiness in the culture media, however microscopic examination showed no organisms were visible. By chemically analyzing the "K" media, it was concluded that the electronic bombardment had produced an ionization in the "K" media. To counteract this ionization, the test tubes were placed in a 2-inch water vacuum and incubated at 37.5 degrees C for 24 hours. Subsequent examination at 20,000 X revealed the "K" media to be teaming with the smallest of any forms observed. These forms of the cancer virus were called "BX" and refract a purplish red in a monochromatic beam of the microscope.

This method of ionization and oxidation brought the chemical refraction of the "BX" out of the ultra-violet and into the visible band of the spectrum. Owing to the fact that these test

tube specimens had gone through so many trials, we again started from scratch and repeated this method 104 consecutive times with identical results. The "BX" virus was given a complete breakdown to determine its chemical constituents and characteristics, which are previously noted in this report.

By continued microscopical study and stop motion photography, it was found that the "BX" virus had many changes and cycles as so with other micro-organisms. The virus can be readily changed to other forms or cycles of themselves by the media upon which they are grown. By altering the "K" media slightly acid, we no longer have a "BX" as we have classified this cancer virus, but we have what we term a "BY". In this stage or form, it is still a virus, but considerably enlarged from the initial "BX". Still retaining a purple red refractive index, but will no longer pass the porosity of the W (?) porcelain or diatomaceous earth filter. In this stage, the "BY" requires a much coarser "N" filter.

The next stage finds this micro-organism, now known as the monococoid form in the monocytes of the blood of over 90% of carcinomatous individuals. This form can be readily seen when properly stained with a combination of a silver nitrate and gentian violet with the standard research microscope.

As we change the media again and this time going from a fluid to a hard base media (using asparagus or tomato agar), we no longer have a "BX", or "BY", or monococoid micro-organism, but we have a cryptomyces pleomorphia fungi. Any of these forms can be changed back to "BX" within a period of 36 hours and will produce in the experimental animal a typical tumor with all the pathology of true neoplastic tissue, from which we can again recover the "BX" micro-organism. This complete process has been duplicated over 300 times with identical and positive results.

After one year, we take this same stock culture of dormant cryptomyces pleomorphia fungi and plant it back on its own asparagus base media; there is no longer a cryptomyces pleomorphia, no longer a monococoid organism such as is found in the monocytes of the blood, there is no longer a "BX" or "BY" form, but there is, from the initial virus isolated directly from an un ulcerated human breast mass, a BACILLUS COLI, that will pass any known laboratory methods of analysis.

We are positive from our careful work and technic, that the causative agent of malignancy can be definitely identified as bacillus coli as the basic form. "BX" is a bipolar virus, that is, retraction occurs to both positive and negative poles, but both the positive and negative forms of this virus are required to produce tumors in experimental animals. We have never publicly announced that "BX" is the cause of cancer, but we have succeeded in producing from its inoculation the tumors as stated before with all the true characteristics and pathology of neoplastic tissue from which we have repeatedly recovered the "BX" virus. Many researchers have attempted to repeat this technic but have failed for the prime reason of the lack of an adequate microscope.

## **Understanding Electromagnetic Fields and Rife Technology**

It should be noted that all Rife devices produce EMF to varying degrees.

The earth itself produces a constant EMF field, which we are constantly exposed to. Many EMF researchers believe that the earth's polarized EM field has potential health benefits. Emf can create or destroy, protect or restore. Yes EMF can do damage, but it can be directed as any form of energy to accomplish positive things as well. Electrical current and voltage can both destroy or construct depending on the application. The same holds true with EMF.

When an electrical current flows an electromagnetic field forms around the conductor. The voltage and current flowing and the type of current flow (Ac, Dc, pulsating Dc, etc) determine the size and strength of the EM field. As well as the conductor through which the current is flowing. The size, shape and type of conductor make a big difference in the EM Field.

1. X-rays
2. Ultraviolet (UV) light
3. Visible light, infrared light (IR),
4. Microwaves (MW)
5. Radio-frequency radiation (RF)
6. Magnetic fields from electric power systems are all parts of the electromagnetic (EM) spectrum.

The parts of the electromagnetic spectrum are characterized by their frequency or wavelength. The frequency and wavelength are related, and as the frequency rises the wavelength gets shorter. The frequency is the rate at which the electromagnetic field goes through one complete oscillation (cycle) and is usually given in Hertz (Hz), where one Hz is one cycle per second.

Electromagnetic fields are what are said to hold the atoms of matter together (in atomic theory). It is the force holding electrons in orbit around the nucleus of atoms. It is possible to make an atom of something resonate with an EM

field, or current. If you increase the power of the resonance enough, heat will be generated, and if the power is increased enough, atomic structure will break down.

The interaction of biological material with an electromagnetic source depends on the frequency of the source. We usually talk about the electromagnetic spectrum as though it produced waves of energy. However, sometimes electromagnetic energy acts like particles rather than waves, particularly at high frequencies. The particle nature of electromagnetic energy is important because it is the energy per particle (or photons, as these particles are called) that determines what biological effects electromagnetic energy will have.

At the very high frequencies characteristic of UV and X-rays (less than 100 nanometers), electromagnetic particles (photons) have sufficient energy to break chemical bonds. This breaking of bonds is termed ionization, and this part of the electromagnetic spectrum is termed ionizing. The well-known biological effects of X-rays are associated with the ionization of molecules. At lower frequencies, such as those characteristic of visible light, radio-frequency radiation, and microwaves, the energy of a photon is very much below those needed to disrupt chemical bonds. This part of the electromagnetic spectrum is termed non-ionizing. Because non-ionizing electromagnetic energy cannot break chemical bonds there is no analogy between the biological effects of ionizing and non-ionizing electromagnetic energy.

Non-ionizing electromagnetic sources can produce biological effects. Many of the biological effects of ultraviolet (UV), visible, and infrared (IR) frequencies depend on the photon energy, but they involve electronic excitation rather than ionization, and do not occur at frequencies below that of infrared (IR) light (below  $3 \times 10^{11}$  Hz). Radio-frequency and microwaves sources can cause effects by inducing electric currents in tissues, which cause heating.

The efficiency with which a non-ionizing electromagnetic source can induce electric currents, and thus produce heating, depends on the frequency of the source, and the size and orientation of the object being heated.

At frequencies below that used for broadcast AM radio (about  $10^6$  Hz), electromagnetic sources couple poorly with the bodies of humans and animals, and thus are very inefficient at inducing electric currents and causing heating.

Thus in terms of potential biological effects the electromagnetic spectrum can

be divided into four portions:

1. The ionizing radiation portion, where direct chemical damage can occur (X-rays, "vacuum" ultraviolet light).

The non-ionizing portion of the spectrum:

2. The optical radiation portion, where electron excitation can occur (ultraviolet light, visible light, infrared light).

3. The portion where the wavelength is smaller than the body, and heating via induced currents can occur (microwaves and higher-frequency radio-frequency radiation).

4. The portion where the wavelength is much larger than the body, and heating via induced currents seldom occurs (lower-frequency radio-frequency radiation, power frequencies fields and static fields).

Most Rife transmissions fall within a safe EMF level, are non-ionizing in nature, and are limited in both power as well as frequency output ranges so as not to produce destructive heat (as for example one would see with microwaves operating at 3.3ghz, the frequency to boil water).

It can also be seen that much higher powered Rife EMF output could pose potential health risk. Those constantly seeking "more power," may actually be moving in the wrong direction.

A clear understanding of EMF can give one the proper balance of both the possible dangers as well as potential benefits.

In Rife equipment, the frequencies and electro-magnetic field is what does the work of killing, or altering living things, as well as altering none organic (none living) things. EM fields can change the way living things function, or stop their function altogether.

The Rife frequency instrument kills the "normal" carcinoma cancer cell by rupturing the thousands of BX cancer viruses they contain and thereby dumping the BX cancer virus contents into the cancer cell cytoplasm. This BX cancer virus as Rife named it in 1931 is not a virus by the normal standard usage of the term today. Rife based his definition on the fact that the BX cancer virus could pass through the finest Berkefeld porcelain filter of the time (000 filter). The BX cancer virus is ovoid in shape, .066 microns along the major axis and .05 microns along the minor axis. It is motile, driven by a proton transport flagella the same as its bacterial parent, the E-coli bacteria. **When the BX cancer virus is ruptured it spills out its genome, ribosomes, RNA, enzymes, and various proteins. When thousands of these ruptures occur all at once in a carcinoma cancer cell the results are fatal to the cancer cell.** A similar situation occurs in the sarcoma cancer cell when the BY cancer viruses are all disintegrated at once. The BY cancer virus is another form of the BX cancer virus which Rife found caused sarcoma cancer after it had been exposed to prolonged ultraviolet light exposure.

**Knee\_joint\_pain** - 1550, 880, 802, 787, 727, 28, 20, 7.69, 3, 1.2, 250, 96, 93.9

**Lac\_deflorat** - 230, 371, 232, 2121

**Lambliia** (use Parasites, Giardia)

**Large\_intestine\_tonic** - 80, 440, 880

**Laryngeal\_polyp** - 765, 202

**Larynx** - 10, 440, 465, 444, 1550, 880, 802, 787, 727, 28, 7.69, 39, 120, 250, 96, 93.9

**Lateral\_sclerose** (degeneration of spinal cord leading to spastic paraplegia. See also ALS.) - 254

**Laxative\_mild** - 802

**Legionella** (Legionnaires' disease, caused by a gram-negative bacteria)

associated with condensed or treated water that migrate to lung tissue and stimulate severe respiratory manifestations, fever, headache, abdominal pain, and may affect kidneys and liver.) - 723, 724, 897, 975, 8120, 8856, 690, 693

**Leiomyoma** (use Fibroma)

**Leishman\_Donovan** (use Parasites, Leishmania)

**Leprosy** - 10000, 6000, 743, 600, 252

**Leprosy\_secondary\_infection** - 1600, 1550, 1500, 880, 832, 802, 787, 776, 760, 727, 700, 690, 666, 650, 625, 600, 465, 444, 20, 500, 450, 440, 428, 660

**Leptospirosis** (a spirochete bacterial disease that is spread to humans through animal urine that can cause meningitis, jaundice, anemia, miscarriage, and death) - 612, 663

**Leukocytogenesis\_stimulation** (see also Immune system stimulation) - 20, 727

**Leukoderma\_acquired** (use Vitiligo)

**Leukoencephalitis** (inflammation of brain's white matter, usually in infants and children, but also found in horses as a result of forage poisoning) -324, 572, 776, 934, 1079, 1111, 1333

**Leukoencephalitis\_secondary** - 338, 783, 932, 1035, 1160, 1630, 712, 713, 715, 1244

**Leukoplakia** (white patches on mucous membranes, also see EBV, Papilloma, and Cancer, carcinoma freqs) - 465, 2127, 2008, 727, 690, 666

**Leukose** (proliferation of tissues that form white blood cells; considered to be foundational stage of leukemia. See also Cancer Leukemia, Parasite general, Parasite fluke sets) - 612, 633, 653, 3722, 644

**Lipoma** (benign, soft tumor of fatty tissue. Also use Liver support.) - 47, 606, 709

**Listeriose** (a serious disease causing miscarriage, meningitis, and endocarditis in humans; known as circling disease in ruminants and causes liver necrosis in animals with single stomachs. Also see Strep general and General infection) - 377, 471, 626, 628, 634, 774, 2162, 7867, 714, 724

**Liver\_fluke** (Use Parasites, flukes)

**Liver\_necrosis** (use Listeriose, Liver support, Parasites schistosoma mansoni)

**Liver\_stores\_bile\_cholesterol** - 21.34

**Liver\_support** (also try E\_coli, Parasites\_general and Parasites\_flukes\_general) - 33.13, 1552, 802, 751

**Liver\_enlargement** - 727, 787, 880

**Lockjaw** (use Tetanus)

**Locomotor\_dysfunction\_incoordination** (may be slow results. See also Schumann response) - 10000, 880, 787, 776, 727, 650, 625, 600, 444, 1865, 125, 95, 72, 20

**Low\_blood\_pressure** (use hypotension)

**Luesinum\_Syphilinum** (use Syphillis)

**Lumbago** - 10000, 800, 880, 787, 727, 125, 95, 72, 444, 1865, 9.19, 8.25, 76.9, 300

**Lung** (general) - 90, 3672

**Muscles\_to\_relax** - 965, 20, 120, 240, 760, 6.8, 6000, 304

**Muscle\_tonic** - 20, 120, 240, 300, 304, 328, 728, 880, 5000, 10000

**Muscular\_dystrophy** (disorder characterized by weakness and progressive wasting of skeletal muscles despite no concomitant wasting of nerve tissue. Aspartame, mercury, benzene, lead, and toluene can cause same symptoms. Also use Parasites flukes and see Parasites general, ALS, MS sets) - 153, 522, 146, 880, 787, 727

**Muscular\_pain\_and\_injury** (also see Pain and General antiseptic) - 2720, 6000, 320, 250, 240, 160, 125, 80, 40, 20

**Mycogone\_spp** (homeopathic allergenic preparation based on fungus) - 371, 446, 1123, 748

**Mycogone\_fungoides** - 488, 532, 662, 764, 852, 1444

**Mycogone\_fungoides\_secondary** - 328, 367, 490, 491, 495, 496, 628, 678, 761, 766, 768, 1055, 1074, 9979, 709, 714, 729, 746, 757

**Mycoplasma\_fermentans** (exp. May be a factor in ALS, chronic fatigue, alzheimer's, parkinson's, and MS) - 2900, 878.2, 880.2, 864, 790, 706.7, 690, 610, 484, 986, 644, 254

**Mycoplasma\_General** (can be useful for lung, sinus, and other problems which do not respond to other frequencies) - 7344, 2950, 2900, 2842, 1147, 1113, 1067, 1062, 1045, 986, 970, 880.2, 878.2, 865, 829.3, 800, 790, 784, 780, 706.7, 691, 690, 687, 684, 679, 674, 664, 644, 610, 484, 254

**Mycoplasma\_pneumonia** (use Pneumonia, mycoplasma)

**Mycosis\_fungoides** (a form of skin cancer resembling eczema) - 532, 662, 678, 852, 1444

**Myocarditis\_narbe** - 279, 761

**Myocarditis\_necrose** (homeopathic remedy from heart cells that died as a result of inadequate blood flow to them. See also Circulatory stasis) -706, 789

**Myoma** (a benign tumor on the uterus) - 253, 420, 453, 832

**Myositis** (involves progressive muscle weakness) - 120, 122, 125, 129, 1124, 1169, 762

**Nanobacter** (Nanobacteria sanguineum, a nanobacteria which can be found in some calcium deposits in the arteries, kidneys, gallbladder, muscle and joints

as well as in increased numbers in those with "autoimmune" diseases such as lupus, psoriasis, scleroderma, and similar disorders) - 634

**Nasal\_infection** (use Sinusitis and Rhinitis)

**Nasal\_polyp** (benign growth inside the nasal passage) - 542, 1436

**Nasturtium** (a healing herb) - 143

**Nausea\_and\_cramping** (also see Parasites, enterobiasis, roundworms, and Parasites, general) - 72, 95, 190, 880, 832, 787, 727, 20, 4.9

**Nematodes** (Use Parasites, nematodes)

**Neoplasms** (Use cancer)

**Nephritis** (kidney inflammatory disease. Also treat for stones and crystals supplementally, or nephrosis non inflammatory kidney disease) - 1550, 274, 423, 636, 688, 880, 787, 727, 10, 20, 10000, 40, 73, 465, 3000

**Nerve\_disorders\_and\_neuropathy** - 10000, 3176, 2720, 2489, 2170, 2112, 1800, 1600, 1550, 880, 802, 787, 727, 660, 650, 625, 600, 440, 125, 95, 72, 20,

**Nervousness\_Prozac\_agitation** (akathisia. See also Relaxation) - 78.3

Neuralgia (a painful disorder of the nervous system) - 833, 39, 10000

**Neuralgia\_intercostal** - 802

**Neuralgia\_trigeminal** - 880

**Neurosis** - 28

**Neurospora\_sitophila** - 705, 878

**Nigrospora\_spp** - 302, 350, 764

**Nocardia\_asteroides** (the microorganism causing Nocardiosis, an infectious pulmonary disease characterized by abscesses in the lungs. Also see Streptothrix.) - 228, 231, 237, 694, 719, 747, 887, 2890

**Nose\_infection\_congestion** (use Sinusitis and Rhinitis)

**Numbness** (also see Circulatory stasis) - 10000, 2720, 2489, 2170, 1800, 1600, 1550, 802, 880, 787, 727, 650, 625, 600, 440, 660

**Oat\_smut** - 806

**Oligodena** - 853

**Oospora** - 9599, 5346

**Oral\_lesions** (chronic cases will always return until metal dental work is replaced with uranium free porcelain. See also herpes simplex I and use Stomatitis) - 2720, 2489, 2008, 1800, 1600, 1550, 802, 880, 787, 727, 465, 444, 522, 146

**Orchitis** (inflammation of testes due to TB, mumps, gonorrhea, cancer, bacteria, etc. See also causative condition if known) - 2720, 2489, 2170, 2127, 2008, 1800, 1600, 1550, 802, 1500, 880, 832, 787, 776, 727, 690, 666, 650, 625, 600, 125, 95, 72, 20

## **Frequently asked questions about the TrueRife system**

### **What is the TrueRife Frequency Generator?**

The TrueRife F-117 frequency generators create square wave pre-set frequencies. Both systems allow for sweeping as well as a pulse mode for greater effectiveness. The system comes complete with an Ateleir Robin frequency generator at its heart and produces an electromagnetic field as well as radiated radio frequencies in the audio range. As the waves travel through the body, the organisms that are resonant to the wave will demodulate the signal (these are the targeted microorganisms known to cause disease). This is the same way your radio works, a resonant circuit is created by changing the radio's tuning and you are able to selectively demodulate just one radio station at a time. If there is no resonance, the wave passes through unchanged with no effects. The plasma bulb acts as the emitter or antenna to broadcast the frequencies directionally. This is the same system in principle that Rife used in the 1930's for his experimentation.

### **What is the advantage of the plasma bulb over the direct contact method or an antenna?**

Audio frequencies have a very long wave (this is the formula:  $3,000,000/\text{frequency in hz}$ . So  $3,000,000/1000 =$  a 300 meter /1000 foot long antenna!). Therefore an antenna would be much too large to concentrate the E M energy where you want it. Furthermore you can see the plasma bulb light up, so you can see that the system is truly working. There simply is no way to know for sure that anything is actually being produced by pads or antenna without some sort of device to measure the output. Our bulbs run cold /warm, so a person can also use them as a direct contact device with grounding if they choose to do so. Some individuals have claimed excellent results for pain relief using this method! The human body is a semiconductor, so we generally prefer allowing frequencies to pass through the body as opposed to trying to introduce them electrically through an audio card or similar device. These bulbs are specifically built for TrueRife to our specifications, and are made with filtered glass for UV filtering. Our manufacturer claims up to 30 years bulb life since there are no filaments to burn out!

### **What is the range of your equipment?**

Our policy is the closer the better for specific problems. Thus we have created a removable handheld bulb holder and boom arm stand to place the TrueRife bulb as close as possible to the subject. However, we have conducted test demonstrating complete body penetration of the frequency waves over several feet. The laws of physics say that for every doubling of the distance you get 1/4 of the power. So, if one is sitting 4 feet away from the plasma lamp, and moves 2 feet closer, they are receiving at least 4x more of the power of the emitted field.

### **How effective is the TrueRife system?**

It accurately delivers the frequency presets as well as programs created by the user. We have demonstrated complete body penetration. Although we have testimonials as to amazing results and claims for those who have tried this system, FDA regulations do not allow us to make any health claims as regards the effectiveness of these devices.

### **How often might I run sessions?**

For serious issues, some people begin with one to two sessions per day with 6 hr intervals between sessions for detoxification. It may take weeks or months of repeating these sessions before seeing results. However, I have witnessed testimonials of results within minutes to a few hours from individuals suffering from Pain, Sinus Infections, Poison Ivy, etc. Most, if not all individuals with more critical issues such as Cancer, Hepatitis C, Aids, or Herpes, report no significant observable change until days or weeks have passed after regular treatments.

### **How does the TrueRife system compare to other systems?**

We encourage you to compare our product to other available systems. Every person has a different budget as well as different needs. We at TrueRife have tried to offer as effective a system as possible, that is user friendly, while still keeping the cost low. We have seen comparable systems selling for several thousand dollars more than our products. Tremendous amounts of time, energy, research and resources have been expended to create this technology. We have tried to keep our cost down while not sacrificing the quality or effectiveness of the system. Each unit is hand built and bench tested for before it is released for use.

### **How exactly do EM fields work?**

Understanding EM fields / Rife Technology and their impact on living organisms

A Rife function generator does not produce pressure waves in air. It produces an electrical signal, of the chosen frequency and type (sign, square, etc.) When an electrical current flows an electromagnetic field forms around the conductor. The voltage and current flowing and the type of current flow (Ac, Dc, pulsating Dc, etc) determine the size and strength of the EM field. As well as the conductor through which the current is flowing. The size, shape and type of conductor make a big difference in the EM Field.

Electromagnetic fields are what are said to hold the atoms of matter together (in atomic theory). It is the force holding electrons in orbit around the nucleus of atoms. It is possible to make an atom of something resonate with an EM field, or current. If you increase the power of the resonance enough, heat will be generated, and if the power is increased enough, atomic structure will break down. An example of this break down is an atomic bomb. Of course the effects of current and EM fields are quite different at different frequencies and powers. When your brain tells your finger to move (using an electrical current) there is no damage done. The Electro chemical reaction in your muscle

produces heat. The more work you do the more heat is produced, in hard work you will sweat, to cool your body.

EM fields can do work, as in an electric motor. EM fields can carry information as in Radio and TV. EM fields are a part of how your brain works. Electrical current controls your heart rhythm. Electrical current is in part what makes your muscles contract. Electrical current does not exist without producing an EM field. And the opposite is also true, an EM field does not exist without an electrical charge being present. In Rife equipment, an Electro-magnetic field is what does the work of killing, or altering living things, as well as altering none organic (none living) things. EM fields can change the way living things function, or stop their function altogether.

### **Are there any "Bad Frequencies?"**

Some researchers have reported on six possible frequencies: 1840, 1910 helps Mal growths. One report states that 10000 Hz may cause edema if run over 10 minutes, and 925, 1850 or 962 Hz may contribute to arthritis pain. We are not aware of any other frequencies that have a negative impact. Healthy human cells oscillate at 70 Million Hz, far beyond the ranges of the TrueRife system. Your microwave heats water molecules at approximately 2.3 GigaHertz!

### **Is the system safe for use?**

We are not aware of any known risk or side effects associated with the TrueRife system when following standard recommendations. We have taken safety precautions to create what we feel is a highly effective system, running a "cold bulb" transmission, and limiting the power output as well as frequency ranges to a safe zone and level. The EM Field is safely limited to a few feet, and weakens eponentially.

As regards EM Fields posing a possible health hazard: In 1996, the National Academy of Sciences (NAS) reviewed the scientific literature regarding EMF effects on health. The NAS concluded that power-line EMF (60Hz) was not a human health hazard, stating:

“Based on a comprehensive evaluation of published studies relating to the effects of power-frequency electric and magnetic fields on cells, tissues, and organisms (including humans), the conclusion of the committee is that the current body of evidence does not show that exposure to these fields presents a human-health hazard. Specifically, no conclusive and consistent evidence shows that exposures to residential electric and magnetic fields produce cancer, adverse neurobehavioral effects, or reproductive and developmental effects.
